SUMMARY

UI designer with proven creativity and problem solving skills. Passionate about creating design solutions that enhance the user experience. Consistently promoted due to work-ethic and ability to execute responsibilities. Seeking to bring value to a collaborative and inclusive work environment.

PROJECTS

REBOUND | E-COMMERCE APPLICATION

- Created an application for an e-commerce website enabling users to browse and purchase products with confidence and ease. Project includes user flows, low-to-high fidelity wireframes, and mockups of the design.

BOOK IT | MOBILE APP FOR IOS + ANDROID

- Conceptualized and designed a native application following iOS and Material Design guidelines. The project includes a working prototype that allows users to book a reservation at their favorite local restaurant.

SMOOTHIE VAULT | WEB APPLICATION

- Built a responsive web app that solves issues with current recipe apps on the market today. This project includes user research, competitive analysis, user flows, user personas, and mockup examples.
